

Organic gouvment food from Serbia

Natural food from Serbia

IGDA is pleased to introduce Eco line of products including wild, handpicked mushrooms, black and white truffles as well as some of the tastiest fresh and frozen fruits of Serbia.

IGDA wild mushrooms - porcini, chanterelles, black trumpets and morels are collected the old fashioned way, in the forests and mountains of the Balkan Peninsula.

IGDA mushrooms - shiitake and oyster are cultivated in organic conditions.

They are air dried naturally; containing no pesticides, preservatives or chemicals.

IGDA's specialties are fresh and pasteurized black and white truffles.

IGDA fruits – Serbia has one of Europe's best microclimates for fruit production, especially berries. Result – our fruits have beautiful deep color, superior aroma and high nutrition value

IGDA products are prized for their wonderful wild flavor and distinctive, natural aroma.

In an era of giant corporate farms, where flavor is often sacrificed for uniform appearance, IGDA stands out in its commitment to nature grown products.

IGDA line of products takes you back to a time before chemicals were widely used and apart from the health reasons there is one major benefit of organic gardening – TASTE!

IGDA is a regular participant of many world food exhibitions like:

ANUGA, Köln

Fruit Logistica, Berlin

BioFach, Nürnberg

SIAL, Paris

IFE, London

Fancy Food, NY

MIHAS, Malaysia

Foodex, Tokyo
